

# Architecture Engineering and Construction Spatial Collaboration Solution from Esri UK and GeoEnable

**Make better informed decisions, reduce costs and de-risk your project.**

The Architecture, Engineering and Construction (AEC) Solution from Esri UK and GeoEnable is the best way to provide a scalable, business-wide, spatial collaboration platform for any of your projects.

The AEC Solution combines our proven Location Analytics technology with tried and tested services focused on maximising your investment.

Our AEC platform delivers safer, simpler and time-aware collaborative project planning and construction logistics.

- **A Common Operating Picture (CoP) for all stakeholders**  
Ensure all your employees from board level to workforce have the same picture of project progress and immediate awareness of changes to programme and logistics
- **Whole-life Geospatial Information Management**  
Ensure your survey, CAD and GIS datasets are used, re-use and published efficiently across your whole organisation
- **Strategic, tactical and operational project planning**  
Give different types of user the ability to access appropriate details of projects, developments and assets
- **Process, workflow and Information Management (IM) led implementation**  
Integrate architecture, engineering, construction, and owner organisations with structured and efficient processes and data workflows
- **Services to help you work towards a Common Data Environment (CDE)**  
Securely and easily allow all stakeholders, internal or external contractors and suppliers, access the same 'Single Source of Truth' with a common data environment and common plans

## A Single Platform for AEC

### Esri UK's platform includes:

- Secure, cloud based spatial collaboration platform
- Business-wide reuse of existing CAD, survey and GIS data
- Dynamic, time-aware mapping
- Informed and empowered mobile field workforce
- Integration with Microsoft Office
- Innovative 3D visualisation and analysis
- Access to free basemaps and online content
- Powerful spatial dashboard
- Jumpstart programme that provides hands-on support to get you up and running quickly
- UK Support Team
- Simple annual fixed payments for easy budgeting

## Key features

Designed specifically for AEC projects, the solution provides world class Location Analytics technology and proven services to help maximise the uptake and roll-out. The platform is available from a simple Cloud based solution which requires no hardware installations, to the more advanced solutions for the GIS and data analyst specialists. The packages include software, on-boarding jumpstart, training and professional services.

The solution is provided at three different levels, enabling you start small and quickly drive real business benefit and Return on Investment. As these benefits are realised, demand for the solution will grow across the organisation, and this can be easily met by additional capability and services in subsequent levels.

Pricing is simple, via single annual payments over a three year term, helping you to budget with certainty.

### About Esri UK

Esri UK is a privately held, UK-owned company that provides world-class enterprise geographic information systems (GIS). Our solutions help governments, businesses and educational institutions make timely, informed and mission-critical decisions by leveraging the power of geography. Headquartered in Aylesbury, Esri UK operates from five regional offices across the country.

### About GeoEnable

GeoEnable is a privately held, UK-owned company that specialises in consultancy and solutions for all aspects of mapping, GIS, Business Intelligence (BI) and Information Management (IM) where location is central. Their team is experienced in improving business efficiencies with lean, Geo-Enabled business processes. GeoEnable's vision is to see geography and the power of map visualisation embedded in mainstream ICT and business processes – this is what they call 'Geo-Enablement'. GeoEnable are Esri Partners, specialising in ArcGIS Online and Location Analytics.
